

COVID-19 Response: Collaboration across the Continuum

Overview:

Novel Coronavirus Disease 2019 (COVID-19) is a new disease is a serious global health threat and has taken the healthcare community by storm. With almost 8 million cases and 200,000 deaths in the United States, the healthcare community has come together to care for patients and the community

Join IHA and LeadingAge Illinois for a three part webinar series with hospital and long term care partners to hear their about how they worked together to overcome care coordination challenges, collaborative successes, and lessons learned to support their patients and community during the COVID-19 pandemic.

Presenters will focus on strategies and give attendees an opportunity to engage in discussion around:

- **Infection Prevention Best Practices:** how hospitals and long term care facilities shared infection prevention knowledge/expertise/support between facilities
- **Person Protective Equipment:** how facilities worked together to overcome PPE challenges
- **Testing:** how organizations worked together to facilitate testing of patients
- **Patient Transfer:** how organizations worked together to successfully transfer patients
- **Staff Morale:** how organizations worked on addressing staff morale

Target Audience:

This event is open to all IHA and LeadingAge Illinois members. We invite your staff to join this series – including discharge planners, care coordinators, hospital leadership, frontline staff, quality and patient safety leaders, and other related disciplines.

Series Overview:

- Tuesday October 20, 12:00-1:00pm
Silver Cross Hospital, Victorian Village, Ferrell Hospital, and Wabash Christian Village will share their experiences with partnership among other area facilities, infection prevention support in urban and rural facilities, and support with personal protective equipment.
