Preliminary Economic Impact of Affordable Care Act Repeal

If Congress repeals health coverage for over one million Illinoisans under the ACA and does not replace it, preliminary estimates are that, statewide, Illinois would sustain a potential loss of $11.6 billion to $13.1 billion in annual economic activity which translates to a potential loss of 84,000 to 95,000 jobs.

In addition, Illinois hospitals have already experienced over $1.7 billion in Medicare payment cuts to help pay for ACA coverage. For 2017 – 2026, these hospital cuts will approximate another $10.2 billion.

Position

- Illinois hospitals strongly support ensuring continued access to healthcare coverage.
- Any repeal of ACA coverage should not take effect until the replacement plan takes effect.
- If Congress does not make repeal of coverage contingent on adoption of a replacement plan, then Congress should also repeal the hospital payment cuts that help pay for ACA coverage.

Congressional District 1 – Estimated Economic Impact

- Lost spending for coverage of Medicaid ACA population: $264 million
- Lost spending for coverage of Marketplace ACA population: $77 million
- Lost economic impact with indirect ripple effect: $820 million
- Potential job loss: 5,900 jobs
- Hospital Medicare payment cuts incurred 2010-2016: $102 million
- Additional Hospital Medicare payment cuts 2017-2021: $227 million
- Total Hospital Medicare payment cuts 2010-2026: $684 million

Sources:
- Illinois Department of Healthcare and Family Services (HFS) Medicaid ACA Enrollment by congressional district, June 2016. Note: HFS classified some enrollees as unknown so these enrollees are not included in any congressional district.

Preliminary Economic Impact of Affordable Care Act Repeal

If Congress repeals health coverage for over one million Illinoisans under the ACA and does not replace it, preliminary estimates are that, statewide, Illinois would sustain a potential loss of $11.6 billion to $13.1 billion in annual economic activity which translates to a potential loss of 84,000 to 95,000 jobs.

In addition, Illinois hospitals have already experienced over $1.7 billion in Medicare payment cuts to help pay for ACA coverage. For 2017 – 2026, these hospital cuts will approximate another $10.2 billion.

Position

- Illinois hospitals strongly support ensuring continued access to healthcare coverage.
- Any repeal of ACA coverage should not take effect until the replacement plan takes effect.
- If Congress does not make repeal of coverage contingent on adoption of a replacement plan, then Congress should also repeal the hospital payment cuts that help pay for ACA coverage.

Congressional District 15 – Estimated Economic Impact

- Lost spending for coverage of Medicaid ACA population: $146 million
- Lost spending for coverage of Marketplace ACA population: $49 million
- Lost economic impact with indirect ripple effect: $470 million
- Potential job loss: 3,400 jobs
- Hospital Medicare payment cuts incurred 2010-2016: $41 million
- Additional Hospital Medicare payment cuts 2017-2021: $89 million
- Total Hospital Medicare payment cuts 2010-2026: $291 million
