A crash course on the most critical industry trends.

This is 2020: The year of a global health crisis. The year healthcare workers on the front lines made headlines. This year, words like “acceleration” and “innovation” take on new meaning, transforming consumer expectations and expanding services through telehealth and other virtual care options. Better outcomes, more localized and personal care, greater health equity—it’s all on the table for 2020.

Seize the moment by attending IHA’s 2020 Virtual Leadership Summit. Hospital and health system leaders will get a crash course on the most critical industry trends from local and national thought leaders. Join us live from the comfort of your desk—no travel or fee required!—for two mornings on October 22-23, 2020.
