

RESPONDING TO AN ACTIVE THREAT INCIDENT

NOVEMBER 8, 2018 | NOON - 3:30 PM | INTERACTIVE LIVE WEBINAR

Join this simulation training event to help you and your staff make life-and-death decisions when confronted with an active threat scenario.

IHA's annual Emergency Preparedness Exercise will address a scenario that has taken on increasing urgency—**how to respond to an active threat inside a hospital**. Such incidents require hospital employees to make life-and-death decisions in a matter of seconds. Since no hospital or health system is immune to these types of events, IHA encourages all members to participate in our full-scale, statewide simulation.

Benefits for Your Hospital

- ▶ Offers the opportunity to activate response plans
- ▶ Provides insights to enhance response plans
- ▶ Helps fulfill a requirement of the Centers for Medicare & Medicaid Services that hospitals demonstrate completion of two exercises per year

Registration

The 2018 Emergency Preparedness Exercise is open to all IHA-member hospitals and health systems. See pricing details on our registration page. Continuing education credit is available for nurses.

QUESTIONS? Contact Keneatha Johnson at kjohnson@team-iha.org or 630-276-5415.

WHO SHOULD PARTICIPATE?

The exercise is designed for hospital and health system staff in the following departments or positions:

- ▶ Clinical Nursing
- ▶ Chaplain
